Page 2Page 3 More and more games are added to Apple's App Store, and with the sheer volume, it can be quite overwhelming to navigate if you're looking for a new game to be obsessed with. The App Store has you covered whether you're into puzzle challenges, RPGs, or even dating sims. With hundreds of new games being added daily, we'll keep you updated on the best iPhone games that will keep you occupied during your long commutes. Don't forget to check out our ranking of the best Apple Arcade games, as well, if you're a subscriber to Apple's gaming service. Might we also suggest some of the best relaxing mobile games for just unwinding with too?50. Angry Birds Journey(Image credit: Rovio)Genre: Adventure / Puzzle Price: Free with in-game purchasesWe've got a new entry to the Angry Birds series, and it's great fun. We're travelling around the world with our favorite flock of birds searching for Egg Wonders (egg-shaped artefacts) in a race against time before the Piggies get their hands on them. There are tons of rewards to be unlocked at each level. This is the perfect casual game to play whenever you have a free moment or feel like testing your brain with some puzzles. 49. Stumble Guys(Image credit: Kitka Games)Genre: Casual Price: Free with in-game purchasesIf you've always wanted to play Fall Guys but don't have a console or PC to join in on the fun, I bring you Stumble Guys. Heavily inspired by the Fall Guys, Stumble Guys follows the same battle royale formula with fun obstacle courses. Weeding out those who don't make the cut with one "guy" becoming the champion. This game is fun, silly, and always a laugh with some friends. 48. Alien Isolation (Image credit: Creative Assembly)Genre: Survival horror Price: £12.99/\$14.99The incredible console and PC game is finally available on iPhone, and it's excellent! Based on the Alien film franchise, Isolation looks incredible on iOS, keeping the same tense atmosphere as you roam around your ship. The slightest sound or movement has you sporadically shooting or running for your life from the Alien roaming the ship for anything to devour. This game plays and feels very similar to the console and PC versions, so this could be worth your time if you've never played it before. 47. Marvel Future Revolution(Image credit: Netmarble)Genre: Netmarble)Genre: Action-adventure Price: Free with in-game purchasesThis visually stunning action-adventure game is the closest we've come yet to getting a fully fledged Avengers game on mobile platforms. It's a testament to how far the platform has come over the past few years, quickly catching up to something like the Switch. While it lacks controller options right now, it's still a lot of fun to play through a third-person, story-driven Marvel mash-up with many of the heroes that have hit the big screen over the past 15 years.46. League of Legends: Wild Rift(Image credit: Riot Games)Genre: MOBA Price: free with in-game purchasesWild Rift is a remarkable achievement in that it takes one of the world's most popular games and gets it to work on mobile. This is a spinoff, technically, but so much of it looks and feels like the real thing, including a huge and ever-growing roster, that diehard fans and newcomers alike (I am a newcomer myself!) should have no trouble getting the hang of this MOBA thanks to great mobile controls and a very welcoming tutorial. 45. SuperStar YG (Image credit: Dalcomsoft)Genre: Rhythm Action Price: Free with in-game purchasesIf you love rhythm games and Kpop, then this one is definitely for you. Superstar YG takes your favorite artists from the hugely successful YG label in Korea and puts them into an energetic rhythm game that will have furiously tapping and singing along to some of the biggest pop songs. 44. The Arcana: A Mystic Romance (Image credit: Nix Hydra)Genre: Dating sim Price: Free (with in-app purchases)Based on Otome dating sims, Arcana whisks you away to a mystical tarot world, where you use your gift for the magical arts to romance your favorite characters. There are 22 major Arcana cards, giving you 22 episodes to dive into. Make choices, fall in love and uncover a murder mystery. 43. Crash Bandicoot: On the Run (Image credit: King)Genre: Adventure Price: Free with in-game purchasesCrash Bandicoot is a game that never gets old, from playing it on the PS1 as a kid to enjoying the latest console installment last year. This game will always have me excited. On the Run explains the game perfectly. It's an endless runner with Crash, Coco and Aku Aku, running through different levels to save the multiverse from Dr Cortex. This game incorporates the controls from the console game, Crash's spinning attack, and the jump slides. Unlock cool skins, upgrade the bandicoot base, and even a multiplayer option; there's endless fun to be had. 42. My Friend Pedro: Ripe for Revenge(Image credit: Devolver)Genre: Action Price: Free with in-app purchasesPlenty of games get mobile spinoffs, but they don't always play in the same genre. Ripe for Revenge thus walks a thin line of feeling enough like the original console and PC game to be familiar to seasoned players while also playing differently enough that those players will still want to experience both versions. With thoughtful mobile-centric tweaks to the controls, Ripe for Revenge maintains the chaotic style of My Friend Pedro even as the artwork is more deceptively sweet.41. Last Fortress(Image credit: IM30)Genre: Strategy Price: Free (with in-app purchases)Everyone thought about how they would survive a zombie apocalypse, right? Well, this game puts your theory to the test. You are the leader of a group of survivors. You take refuge in a shoddy house, and it's up to you to build your fortress to fight yourself off from the undead. The game takes strategy games to the next level, making you make tough choices from resources to necessities. Assemble a team, from doctors, chefs, and scientists, anyone you think would be an asset to this fight. Turn to page two for our top 40 best iPhone games... Page 2 (Image credit: Atari)Genre: Puzzle Price: Free with in-game purchasesSometimes you just can't go wrong with a classic. Tetris is one of those times. This falling block puzzle game has withstood the brutal test of time that has claimed the relevancy of countless other games because, well, it's maybe perfect. Yes, in the App Store, it loses a bit of charm given the push to sell microtransactions, but at its core, the game remains one of the all-time greats, and a few ads don't derail this still remarkable, yet simple, masterpiece. 39. New York Times Crossword(Image credit: The New York Times Company)Genre: Puzzle Price: Free with in-game purchasesCalling all coastal elites, your app is ready. Kidding! The New York Times Crossword is famously tough and rewarding and now you can access its puzzles whenever you want without needing to carry around one of those old-fashioned newspapers or whatever they were called. Download this and you'll be asking your friends and coworkers what a five-letter word for "serious" is in no time.38. Apex Legends Mobile (Image credit: EA)Genre: Battle royale Price: Free with in-game purchasesMobile shooters just got a new entry! The hugely successful FPS Apex Legends has just released its mobile version of the game, including an exclusive all-new legend, Fado, just for mobile players. The mobile version of this game plays very similarly to the console/PC with slight changes to the controls, so if you're a fan, definitely give this version a go. 37. NFL Clash(Image credit: Nifty Games, Inc)Genre: Strategy Price: Free with in-game purchasesNFL Clash is, as the name suggests, a reinvention of the popular micro-RTS that Clash Royale helped explode onto the scene years ago. There are literally dozens of viable games in this mold, but the new NFL Clash provides an interesting look at the genre staples like collecting heroes (now star athletes) and taking over territory (now the football field). If you've enjoyed Clash Royale or games like it and you're a football fan, this is a solid reinvention of that time-tested wheel.(Image credit: Psonix)Genre: Sports Price: Free with in-game purchasesEveryone's favorite car football game - Rocket League - is great on iOS. There are slight differences between PC and console, but just as fun. Battle it out in three modes 1v1, 2v2 and Hoops. The controls are slightly different to the PC and console versions, but they are simple and easy to use. You can customize your cars with skins, paints, tires, and cool car animations. Overall the pocket version of this game is great for on the go. 35. Dragonball Legends(Image credit: BNE Entertainment)Genre: RPG Price: free with in-game purchasesA card game with a twist. Nova Island is a 1v1 card battle. You fight for territory using your deck and collect Nova's, a valuable resource. First-person to collect 20 wins. Play cards to gain strength, deal damage and disrupt your opponent's strategy. For those who love a ranking system, there's even a competitive PvP where you can climb the leaderboard. A great pick for those who enjoy an intense non-action strategy game. 34. Golf Odyssey(Image credit: Ruben Pecellin)Genre: Golf/puzzle Price: Free with in-game purchasesIf the madness of What The Golf? Isn't your thing, Golf Odyssey offers a more tranquil golf-adjacent puzzler. Developed by just a single person, Golf Odyssey's color palette is cool and restful, like its music, and the central mechanic of lobbing golf balls over obstacles and into hole-in-ones is as tough to put away as the best App Store favorites. If ever you played the multiplayer Tanks growing up, Golf Odyssey looks and plays a bit like that, but without any explosions.33. Disney Mirrorverse(Image credit: Kabam)Genre: RPG Price: Free with in-game purchasesA reimagining of many of our favourite Disney and Pixar characters unite together to defeat the mirror verse in this incredible action RPG. The mirror verse has alternative dark versions of many of these beloved characters, who try to break through all odd darkness to consume our heroes' world. You can equip characters with armor and weapons and unlock new skills with an impressive skill tree. One of the coolest things is being able to equip Rapanel's iconic frying pan. This game has loads to do, from exploring dangerous dungeons, to limited-time events, and loot-filled chapters. 32. Beatstar(Image credit: Space Age Games)Genre: Music Price: Free with in-game purchasesIf you never really got over the disappearance of Rock Band and Guitar Hero from pop culture, Beatstar keeps your music gaming dreams alive. With the same sort of road of notes to play as expertly as you can and a library of real songs to pull from, including even from your own Apple Music library, Beatstar is basically Pocket Rock Band, complete with difficulties of varying degrees to suit all player skill levels.31. NieR Reincarnation(Image credit: Square Enix)Genre: Adventure Price: FreeNieR Reincarnation is a spin-off of the incredibly popular game made just for mobile. The graphics are incredible, and the game makes some minor changes to accommodate it for a mobile audience. The switch from real-time combat to turn-based combat bodes well, making combat clean and easy to play. If you're a fan of the original series, you might want to check this one out. Turn to page three for our top 30 best iPhone games... Page 3 (Image credit: Heart Machine)Genre: Action-RPG Price: \$4.99 | £4.99Hyper Light Drifter is one of those games where you'd be hard-pressed to find someone who doesn't enjoy it. A killer soundtrack, gorgeous visuals, precise, engaging melee gameplay and fun RPG elements make it one of the most well-rounded games on all its many platforms, but this game is perfect. 24. Pokemon GoGenre: augmented reality Price: free with in-game purchasesIt probably needs no introduction, but let's pretend it does. Pokemon Go is the game that brought catching Pokemon halfway into the real world. Thanks to satellite map data and the entire Pokédex to chase, Pokemon Go became a worldwide phenomenon five years ago and is sending off all AR competitors today too. If you love Pokemon or just need an excuse to go on more walks, nothing will serve you better.23. Hitman: Sniper(Image credit: Square Enix Montreal)Genre: Action Price: \$0.99 / £0.49Step into the shoes of Agent 47 again, but with only your sniper rifle. Become the ultimate sniper assassin in this sniper only mode game of the brilliant Hitman series. There are over 150 missions and 11 different contracts for you to play, with a zombie challenge mode in death valley. 22. The Longest Road on Earth(Image credit: Brainwash Gang)Genre: Adventure Price: \$3.99 / £3.99The Longest Road on Earth is perhaps too weird of a game to be widely enjoyed, but it's daring and soothing at once and deserves your attention. In it, players take on the roles of several people, anthropomorphic animals really, and live out their pixelated, black and white lives to the tune of a stellar indie pop soundtrack. Think of the game as akin to Sayonara Wild Hearts, but instead of heart-pumping dreampop, it's folksy, melancholic, and reflective. 21. Animal Crossing: Pocket Camp(Image credit: Nintendo)Genre: Sim Price: Free (with in-app purchases)Because no one wants to wait any longer for Animal Crossing on Switch (opens in new tab). It doesn't quite have the infinite joys of its handheld cousins but there's adorable charm to be found here as you design your own campground and play host to your favourite Animal Crossing stars. Plus, there's no real reason to invest with actual cash either as you fish, catch bugs, pick fruit, design your camper, and even water flowers to pass the time before a full game arrives. Turn to page four for our pick of the top 20 best iPhone games to play right now... Page 4 (Image credit: Brainseed Factory)Genre: Adventure Price: Free (with in-app purchases)Words have never been more deadly than this magnificent remaster of one of the best mobile games. In this distorted world, our unlikely hero is made of letters, journeying through this hostile world with only the power of words that change the deadly environment around them. Words give you clues as to what dangers lie ahead and tips on how to pass obstacles. This game is smart and creative, so if you love spelling, this one is for you. 19. Very Little Nightmares(Image credit: Bandai Namco)Genre: Puzzle-platformer Price: \$6.99 | £6.99If you've already loved and finished Little Nightmares and Little Nightmares 2 on PC and consoles, this mobile spinoff captures the essence of the series while providing a different, third entry in the series that fans shouldn't miss. It lacks some of the qualities of the main games, but the atmosphere in this puzzling side-story is still rich here just like it famously always has been.18. Monument Valley 2Genre: Puzzle Price: \$4.99 | £4.99Take the Escher-like art of the first game, make it prettier, more challenging, and grander overall. That's the blueprint for Monument Valley 2, it seems because it seems the team at Ustwo Games nailed it. While the sequel didn't light the mobile world on fire the same way the original did, it's actually the better game overall, though both are worth playing so maybe start with the first one if you haven't tried them yet.17. PUBG Mobile(Image credit: PUBG Corp)Genre: Battle royale Price: Free with in-game purchasesPUBG lit the fuse for the gaming world's obsession with battle royale, and though today it's often being supplanted by other games in the genre, for the purists, there's still nothing better. PUBG Mobile is a bit of a strange entity when compared to the console and PC versions, as the in-game events get much wackier than the grounded main game ever does, but the tough-as-nails survival and gunplay is still there in all its admittedly janky beauty.16. Madden NFL 21 Mobile(Image credit: EA)Genre: American football Price: Free with in-game purchasesNot many sports sims translate to mobile so well, but Madden is the best of the good ones. With plenty of crossover content between Madden Mobile and the main game, diehards can keep pace with the competition no matter where they're playing, and there are some unique modes that allow you to experiment with new ways to play when you're away from your PC or console. If it's in the game, it's on your iPhone.15. Ikemen Sengoku(Image credit: CYBIRD)Genre: Simulation Price: Free with in-game purchasesAnime games can be hit or miss, but MHA's Strongest Hero is a hit. If you've seen the anime, you'll know that our main protagonists are heroes in training, and this open-world RPG puts our beloved teens right into the fight as you battle against villains. Patrol the streets of Honoi, team up with your favourite characters and create a squad in this multiplier action RPG. You can even play some real-time PvP battles to test your skills. 5. Pokemon Unite(Image credit: The Pokémon Company International)Genre: MOBA Price: Free with in-game purchasesEveryone loves Pokemon. It's quite literally one of the biggest franchises in this world. And now, with a new free play game exclusively for mobile, who wouldn't want to play Pokemon Unite. Team up in a 5v5 MOBA for a strategic team battle. The aim is to score as much EOS energy as you can. You can collect this by fighting wild Pokemon or pushing your opponents back to their base. Choose from a selection of 29 Pokemon, with more being added gradually.4. Mario Kart Tour(Image credit: Nintendo)Genre: Racer Price: Free with in-game purchasesWho doesn't love Mario Kart? Seriously, I don't know anyone who would say so, do you? While this isn't a 1:1 translation of Mario Kart 8, it's a great mobile spinoff that still contains the charm and deceptive skill ceiling of Nintendo's best-seller. It's also one of the best-supported games on this list, with regular updates adding new courses and events to keep you drifting around the next turn forever. 3. Minecraft(Image credit: Mojang)Genre: Simulation Price: \$6.99 | £6.99The indomitable Minecraft of course deserves a spot high on our list, especially when it's not compromised by the platform at all. With crossplay and the full range of features on offer, this is the pure Minecraft experience players would want. Bring to life unique worlds full of contraptions, landmarks, and plenty of mobs to fight - or go into creative mode and just build, build, build. If you can think it, you can create it.2. GeoGuessr(Image credit: Maguni)Genre: Trivia Price: FreeThere is something so absorbing about GeoGuessr's odd gameplay loop. It's truly unlike anything else on this list. You're shown an image from Google Maps data somewhere in the world. Then you guess where it's from. The closer you are, the more points you score. It's simple, yet irresistible. Sure, it's probably just a program to train AI location services or something, but I don't mind giving our robot overlords a hand in exchange for the thrill of nailing a bulls-eye.1. FlorenceGenre: Adventure Price: \$2.99 | £2.99Most games on this list are built to be played forever. Florence is built to be played once, and depending on how long your commute is, perhaps even in just one sitting. At about 40 minutes long, this relationship drama rethinks gameplay by giving players WarioWare-like tasks to simulate daily life, like brushing teeth, going to school, and sadly breaking up with your partner. It's a human story full of rich art and music and despite its brevity, may stay with you for a long time.
