Thanks for your participation! Recharging any cartridge requires familiarity with secure and conservative recharge practices. When combined with personal discipline and attention to detail, such practices can help create a security margin for the Reloader and the shooter. 1. Never start loading with the mother load of the p³ shown in these recharge data tables, regardless of your experience. 2. NEVER EXCEED MEXIMATE LOADS BECAUSE THE EXCESSIVE PRESS OF THE CREATE RESULT. 3. Discontinue to fire at the first sign of excessive pressure or realize a change in the firearm report. Lot-to-lot variations, design changes, or changes in specification that is in addition to our control may affect components mentioned in this book. To use with security this or any other guide or manual, you must be well informed about the progress of the recharge. We believe that the information offered results in a safe operation if the appropriate equipment and components are reasonably employed. Because the standard precision has control over the selected real components, the way the components are assembled, or the condition or quality of the used firearms, no responsibility, express or implour assumed to use this guide or any other standard product. In no case the precision norm will be responsible for any damages resulting from the use of this book, whether in contract, tort or otherwise, including consequent damage. Storage in p³ to maintain the quality of the product for as long as possible, you have to keep the p³ in a suitable place under appropriate conditions. When possible, store the p³ at a constant temperature, ideally between 12 and 15â ° C, and a relative humidity of 40 € ° 50%. If the air is too dry, it will dry the p³, which will be the pressure, thus affecting performance. Make sure you close the Point container correctly afterwards. later. xjAm PRU amroN 51629972 797358 0.55 nim6,75 XAM PRM amroN 01728382 628568 0.15 nim5.35 xaM 402 amroN 64724882 738978 0.74 niM3.94 xaM B-302 amroN spf yticoleV s/m yticoleV thgieW egrahC redwopnuG 67720492 648698 0.25 niM9.45 xaM 402 amroN 66723692 348309 0.74 niM0.05 xaM B-302 amroN 01922303 788429 5.15 niM .xjAm PRU amroN SPF edadicoleV S/M arovPÂp ad agrac ad osep od edadicoleV 2 egaP .ragerracer oa sodacilbup sodad so etlusnoc erpmeS .oEÂšĂamrofni ed aiug mu omoc sanepa odasu res eved sodad ed ocifiĂrg reuqlauq ,jaer odnum od oEĂšĂautis amu sonem olep moc maioicaler es e sadavired marof avitaler amieug ed saxat sa omoc erbos sepĂšĂamrofni siam etnemavitaçifingis eocenrof ,airoliam a moc oEĂšĂaarapmoc me ,sam ,ortuo reuqlauq euq od osicerp siam res oEĂn edop ocifiĂrg esse .aicnÂArefer omoc 0534 RMI od ohnepmesod o marasu sele - retsehcnIW 803 on odagerrac jsoEĂrg 3411 alab ed jMF omsem o odnasu jsoEĂrg 2.34 (*Âp me agrac amsem a maraset soçitsAlab sueS amroN ad agracer ed launam osson me somacilbup euq ,juçges a ocifiĂrg o uizudorp strofoB ocnerreE O .ohcutrac ed arameĂc amu me mamieug serosluport so omoc me sodivlome oEĂtse serotaf sotium euqrop ,sotulosba sodad recenrof medop acnuvitaler amieug ed saxat ed ocifiĂrg so .retrever medop setnedive amieug ed saxat ,46x7 sagrac meĂ sodasu oEĂs sÂp sesse odnaug ,otatne oN ,retsehcnIW ed sagrac 803 me odasu odnaug ,Âp ed opit ortuo muqla euq odipjĂr siam ocuop mu riga edop sÂp ed opit otrac mu ,olpmexe roP .soir©Ătirç setnererid ed osu od matluser oEĂšĂacifissalc ed sašĂnererid sa "edadreV A" zid socifiĂrg sessed mu adac ,missa adniA .odatsil rosluport od medro ana sepĂšĂairav jĂraton mu ,amieug ed axat ed ocifiĂrg setnererid rarapmoc oA amieug ed axat ad ocifiĂrG .edadilaug aus retnam arap siatneibma sepĂšĂaidnoc samsem sa bos odanezamra res eved 51.0 857819 28122687 Standard MRP Max 56.0Min 53.0 855781 28052562 Pistol Weight Velocity m/s Velocity fps Standard 204 Max. 52.8Min 50.0 850777 27892549 Standard MRP Max 56.0Min 53.0 854784 28022572 Standard URP Max 51.5Min 49 Standard MRP Max. 55.8Min 53.0 847789 27792589 Powder load Speed m/s Speed fps Standard 204 Max 51.8Min 49.0 811780 26612559 Standard MRP Max 57.5Min 55.0 841824 Speed 27592704 URP Standard Max. 50.0Min 47.5 827786 27132579 Powder load weight An extruded powder, fast and double-burning. Works in a wide spectrum of .17 caliber cartridges to large rifles. Excellent choice for low speed loads. For a shooter who is not familiar with the indent of a suitable cartridge for dangerous African animals of the game, it can be nothing less than hell. The versatility of the .375 Holland & Holland Magnum, .416 Rigby, .404 Jeffery and .458 Winchester Magnum has been proven for a long time, but for many shooters, the full house loads represent the quick runway for a flinch. Yes, inevitably, the shooter will have to become proficient with bullet weights and speeds for which these types of cartridges were designed. However, there are many instances for which a hunter would like to use his large shotgun in the lighter game here in the 48 lower states. There is absolutely nothing wrong with taking the .375 for whitetails, but you certainly do not need 4,000 ft.-lbs of energy to killDeer. You like to practice with .470 NE without the punishment on your shoulder? Well, there is a means of generating low-speed ammunition without the dangers associated with the strange pressure peaks of subpressure cartridges. 5744 powder. S was strongly supported for the reduced loads) and in fact relieves some headaches along the way. I think the 5744 accurate is a powder that every recharge should have in your dust cabinet; Works on so many different cartridges, and you can pick it up more often than you think. is a fast-based, extruded powder, which, when used in its normal capacity, is a perfect fuel for large-capacity gun cases from the .41 Remington Magnum to the .44 Remington Magnum, .45 Colt and .454 Casull, straight by the giant .500 Smith & Wesson. In the cases of rifle, 5744 is suitable for the .17 and .22 Hornet, .222 and .223 Remington, as well as the Remington of 7mm-08, .308 Winchester and the WSM family. Loading the choice of powder in the large cartridges mentioned above and is an ideal choice in the larger black powder cartridges, such as the .45-70 government and the 0.45-110 and .45-120. It also serves many of the lever cartridges such as the .30-30 Winchester, .35 Remington, .348 Winchester and .358 Winchester. This powder is one of the most useful powders, if not the most useful, to have in your arsenal. In large cases, so that no filling is necessary. Even the .30-06 Springfield and other popular mothers can benefit from 5744, because speed can be overthrown for the Winchester .30-30 range for a younger shooter or even a new shooter. Do you want a child to grow in a great game rifle without having to buy different calibers? Think about the combination of the Savage Accufit stock (or any other system through which the length of the pull can be changed to accommodate a growing catech) .30-30 at the Full-Throttle A € ° ° 06 things. This shotgun will stay with him or her forever. At Burn Rate Chart, 5744 definitely enters the stroke of the spectrum (slightly slower than the Hodgdon H110 and a little ruffle than the IMR4198), but because of the way it performs in so many different scenes, 5744 guarantees a place in its recharge bench - even if it is for no other reason than to offer reduced loads to new snipers. Take a pound and see how good it is to practice with a large tower ... without the retreat. Exact 5744 from \$ 35.49 in Natchez Shooting Supplies the article originally appeared in the December 2019 edition of Gun Digest The Magazine. Start in Reloading:
